

ROYAL BOTANIC GARDENS,
KEW.

The Director of the Royal Botanic Gardens, Kew,
presents his compliments to Monsieur le Prof. J. Henriques,
and begs to say that he is returning under separate cover
the unique specimen of Voacanga received for examination by
Dr. Stapf, together with a note by the latter.

The tracings of the Dioscorea leaves represent Dioscorea Wel-
witschii, Rendle (the large leaf), and D. dumetorum, Pax.

The Director also hopes soon to be able to send a list of the
names of the plants from S. Thomé, received some time ago.

October 25, 1916.
