

Kew

18 May, 1915

My dear Colleague,

A correspondent of this garden has written to inform me that he is anxious to obtain a small quantity of the seed of

Ornithopus ebracteatus, Protero which unfortunately I am unable to supply as we do not have this species in cultivation here.

If you could without too much inconvenience kindly obtain on my behalf a small quantity of the seed of this species I should be deeply indebted to you.

With very kind regards

Believe me

Yours sincerely

D. Prain

Professor Dr J. A. Henriques,
Director do Jardim Botânico,
Coimbra Portugal.
