

BOTANIC GARDENS

CAMBRIDGE

ENGLAND.

2. 9. 30.

Dear Sir.

Can you possibly obtain for me ripe fruits with seed from a wild plant of Nasturtium officinale R.Br.

If this is possible could you state the locality from which it was collected, when sending. If you could also send a pressed specimen of the parent plant I would be still further obliged though if there is any difficulty about this I would be content with the seed alone.

The plant is urgently required to complete a piece of research on cytology and geographical distribution and it is particularly important that it should not be taken from a botanic garden.

Thanking you in advance , I remain

Faithfully yours

Dr Irene Manton.
