

Oct. 3. 76

My dear Sir

We should be very glad to receive further contributions of dried plants from you. We do not very much care about their being named if only you will place on each label the exact

locality where the specimen
has been gathered. If you
number the specimens and
keep a corresponding set
for yourself we will do
our best to send you
the names as determined
in our herbarium. At
the same time as we are

not rich in Portuguese
plants we should be glad
of specimens of any species
known not to occur except
in Portugal ~~to~~ ^{and to} which you
can ~~tell~~ give authentic names.

We shall be sending
you shortly a box of
S. African and Australian
plants for your garden.
These are likely to be
most useful to you

in the climate of Coimbra

Yours very truly

W. T. Hiselton Dyer
