Surrey,
England -

Oct. 24. 1902.

Dear Sir,

I am examining closely all the British forms of Statice, with a view to re-vising our somewhat puzzling Genus and I am very anxious indeed to compare our species with those that grow in other countries -

For this purpose, I am taking the liberty of writing to ask if you will assist me in the matter by kindly allow-

UNIVERSIDADE DE COIMBRA
BIBLIOTECA
BOTANICA

ing me to see the Examples of
Statice in your Herbarium or
from any others with which
you may be acquainted.

I am particularly anxious to
see examples of Statice from
Portugal, Spain, France,
Belgium, Holland & Germany.

It is needless to say that I
should be most happy to pay
all postal expenses incurred &
would return your specimens
as quickly as possible.

Please accept the reprint
I am sending under a separate
cover.

Believe me,
Very faithfully yours,
Charles E. Salmon.
