My dear Professor Henriques,

I have now compared the remainder of the West African ferns & give the list overleaf. I believe two of the Polypodia to be new species & would like to call them P. Henriquesii & P. Mölleri. The Cicrasheum about which you ask is A. sejunctum, Kuhn., which you find under A. villosum on page of 409 of our Synopsis Silicium, edit. 2.

Yours very truly J.G. Baker

- 36, 73 Davallia Spelunca, Baker
 39 Pteris
 aquilina var. lanuginosa
 42 Nephrolepis acuta, Presl.
 41 cordifolia, Presl
 72 samosa, Moore
 31 Didymochloa lunulata, Desv.
 42 Oleandra articulata, Cav.
 34 Nephrodium albo-punctatum, Desv.
 35 Filius mas var. angustum
 37 subquinquefidium Hook
 = protensum, Abel.
 44 securidiforme (Nutt)
 38 pennigerum Hook
 39 truncatum, Presl
 (new to West Africa)
 32 ex parte virescens, Baker
 (rachis castaneo-eburnea)
 40, 32 ex parte cicutarium, Baker
 64 Polypodium Molleri, Baker
 n. sp.
 45 Henriquezii
 Baker n. sp.
