Director of Botanical Garden, in Coimbra,
Portugal.

Gentlemen:

Bot
Index number
Harbin
The Manchuria Research Society conjointly with the Agricultural Society of Manchuria is organizing a Botanic Garden in Harbin with the purpose of studying the wild Manchurian Flora and securing the possibility of introducing wild growing and cultivated plants of this district into Europe and other countries.

The Society would be glad to enter into closer connection with you for the exchange of herbarium and seeds and living plants and for the exchange of publications as well.

To begin with we are sending you the seeds of some endemical plants of the Manchurian Flora.

Enclosed you will find the list of the plant seeds forwarded.

Awaiting the favour of an early reply we remain

Yours very respectfully

A President of Natural History Section

Secretary

B. Skovtsov
