Ex Anatome humana et comparata

I

Inter vegetabilem animalemq̃ue cellulas nulla perfecta analogia.

II

Cellularum animalium multiplicatio per endogenam divisionem gratuita hypothesis.

III

In elementi anatomici muscularis investigatione praeter primitivum fasciculum non inquirendum.

IV

Systematis nervosi cerebro-rachidiani magnique sympathici structura non differt revera.

V

Cum Cl. *Virchow* album colorem nervorum medullari substantiae tribuendum opinamur.

VI

Nervosi tubuli Cl. *Stilling* artificiales.

VII

Serosis sinovialibusque textibus lymphatica esse anatomice probari nequit.

VIII

Duo systemata pulmonis circulatoria (pulmonare et bronchicum) nonnihil invicem pendent.

IX

Organogenia humana quasi anatomia comparata transitoria minime existimanda.

**Ex Physiologia, Hygieina et chirurgicis
operationibus**

I

Omne vivum ex vivo.

II

Functio cellulae differens in diversis textibus
nec nucleo nec involucro pendet.

III

Ad phaenomena respirationis significanda nihil
combustionē magis improprium.

IV

Congestione tantum explicari nequit calor, qui
in capitis latere, secto cervicali sympathico, ap-
paret.

V

Contractilitatem muscularem sine nervorum
actione nihil adhuc probat.

VI

Alibiles succos per vascula tantum ad elementa organica non importari propugnamus.

VII

Cardiacorum sonituum causa complexa.

VIII

Ad evolutionem usque integram caninorum primae dentitionis, si peculiare non adsint causae, lactatio protrahenda.

IX

Inter constrictionis agentes sarcostriptor hodie praeponendus.

**Ex Materia Medica et Pharmacia, Pathologia
generali et chirurgica**

I

Aut omnia, aut nullum specificum medicamen-
tum.

II

Scilla eo tantum diuretica, quod circulationem
sedat.

III

In sensiferos nervos vim suam diffundit stri-
chnina:

IV

Quam taninum, confestim adplicatum, melius
quam alia quaeque substantia delet.

V

Ad succos servandos methodus Cl. *Appert* omni-
bus anteponenda.

VI

Pathologica physiologia haudquaquam therapiae immediatum fundamentum praestat.

VII

Cl. *Liebig* doctrina de miasmatis et contagione nobis arridet.

VIII

Absorptio purulenta falsam notionem promit.

IX

Ad tumorum canerosorum diagnosim histologici elementi cognitio haud sufficit.

**Ex Pathologia et Therapia medica, Arte obstetricia,
Medicina forensi, publica Hygieina
et Hyppoeratica Doctrina**

I

In Brighthiano morbo non per renes tantummodo albuminosae exsudationes efficiuntur.

II

Pulmonis gangraena ab intensa inflammatione minime pendet.

III

Varicella re ipsa differt a varioloide:

IV

Haec autem varietas variolae.

V

Differentialis diagnosis inter phlegmasias organorum intra-cranianorum impossibilis.

VI

Thyphus-fever immutationibus atmosphaerae generalibus ante, quam miasmaticis emanationibus, tribuendus.

VII

Muscularis rheumatismus vera neuralgia.

VIII

In acida dispepsia utilitas alkalinorum non e vi chemica praesertim emanat.

IX

Hydrargyri usum in peritonite rejicimus.

X

Puerperalis miliaria sudatorium tantum exanthema.

XI

Puerperalis eclampsia ab albuminuria haudquam independens.

XII

In forcipe adplicando, capite foetus in parva pelvi exstante, et quum, fallaci positione, operatio incepta sit, praeceptum Cl. *Chailly* rejiciendum.

XIII

Medicamenta secreta composita omnino prohibenda.

XIV

In variolae epidemia tantummodo, vaccinia deficiente, variolicum pus inoculandum.

XV

In stagnis ac prope habitata loca linum macerari vetandum.

XVI

Sub megalanthropogenesico aspectu matrimonia inter consanguineos deploranda effecta proferunt.

XVII

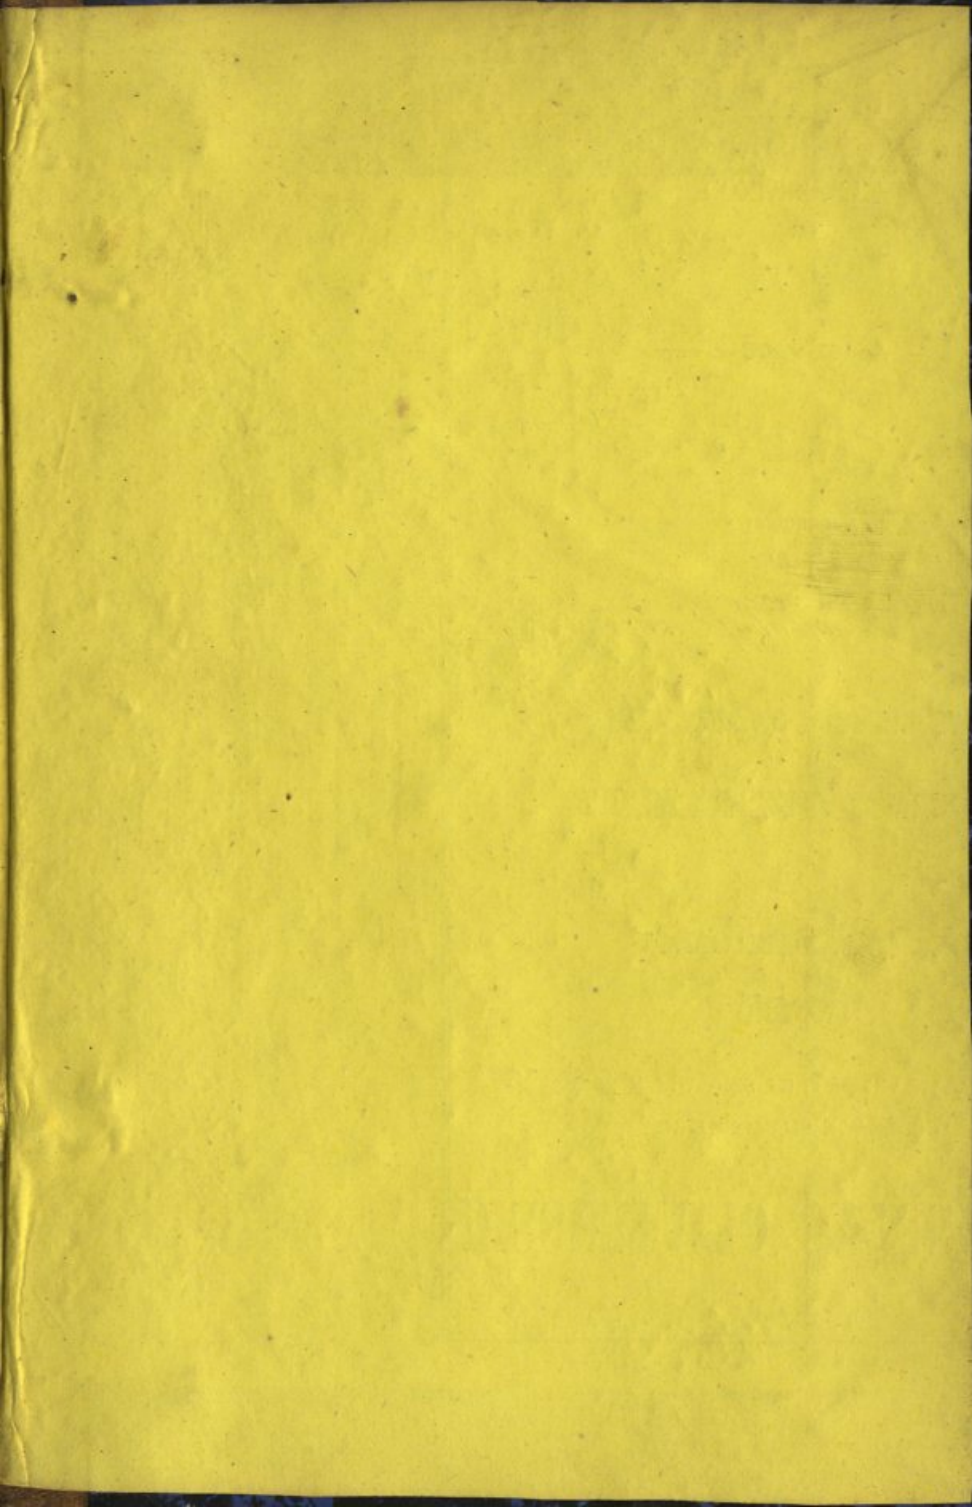

Medicina, ut scientia, ab Hyppocrate principium capit.

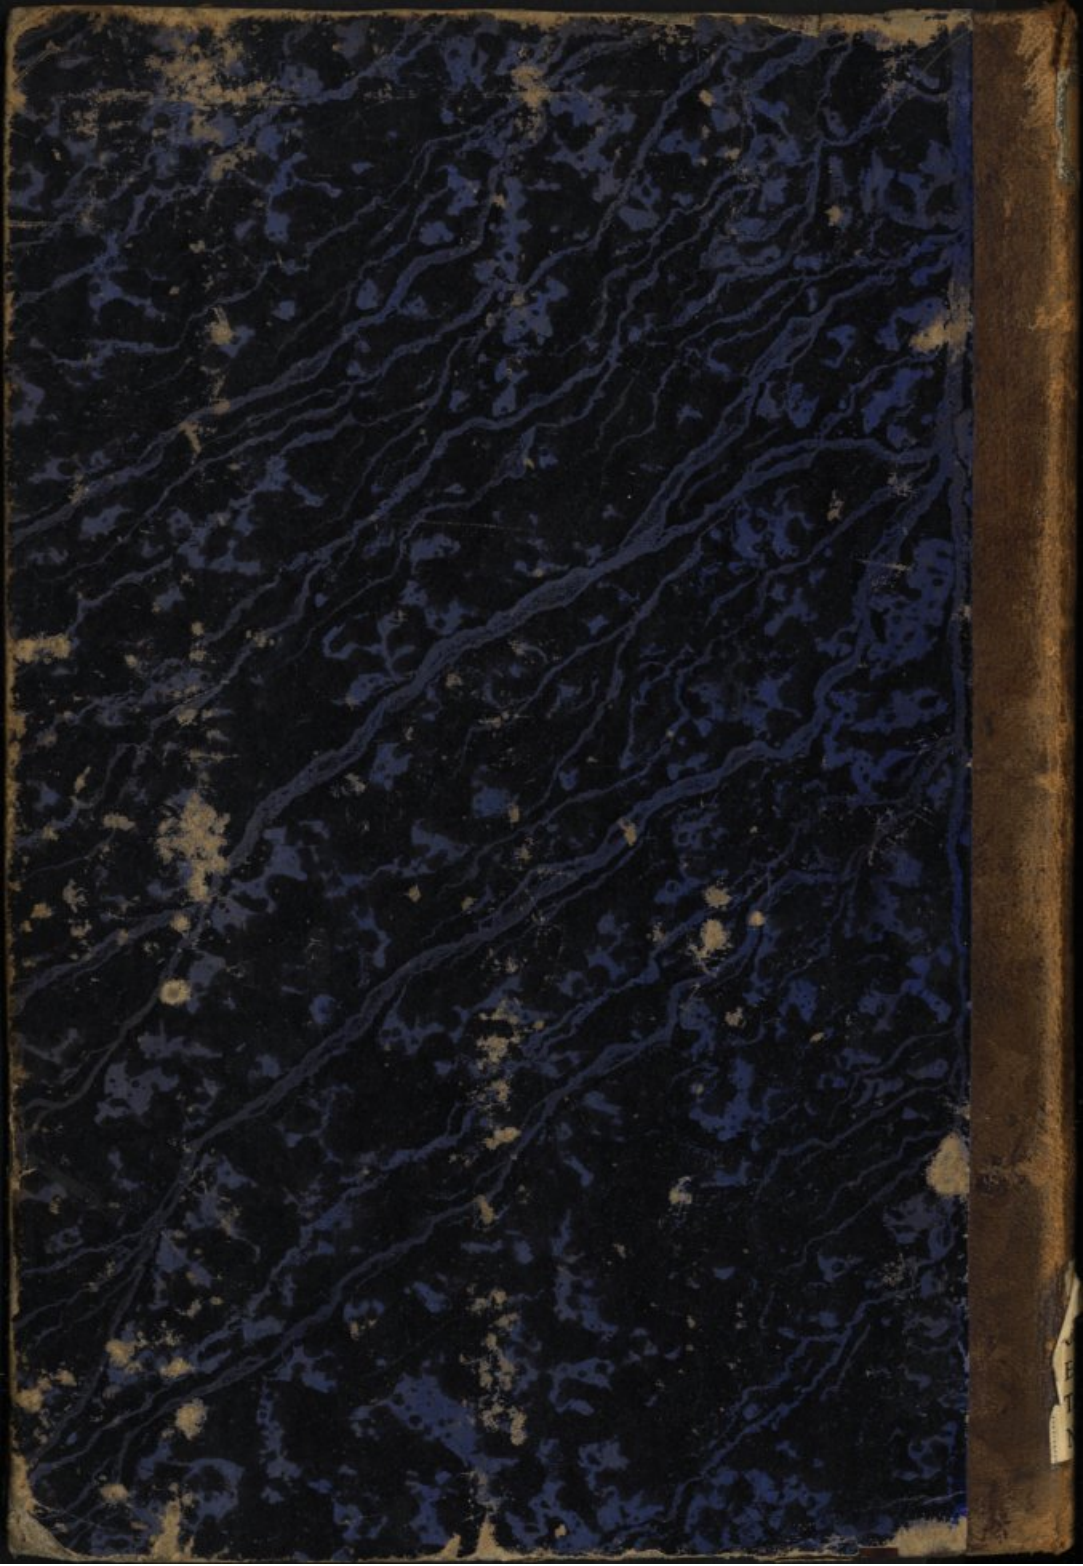

XVIII

- Sect. 3.^a—*Aphor.* 1.^o—Mutationes temporum, etc.
» » » 3.^o—Morbi quoque alii ad alia, etc.
» » » 10.^o—Autumnus tabidis, etc.
» 4.^a — » 15.^o—Si sanguinem, etc.
